Steel Fabrication:

Elegance Steel Fabrication Workshop, we are fully committed to every project acquired. The customer can be assured that a project fabricated by us will be completed on time and in accordance with project specifications and drawings. Elegance Steel Fabrication Workshop prides itself on delivering the highest quality fabricated steel products to the ultimate satisfaction of the local and international customers. We provide well planned, cost effective and sound solutions for all types of structural steel fabrication.

Quality Statement

Elegance Steel Fabrication Workshop defines Quality in terms of successful performance in design, material suitability, manufacturing compliance, work place efficiency, safety, cleanliness and timely delivery of the finished products.

Elegance Steel Fabrication Workshop complies with its Quality System by continually improving technical capabilities, work processes, material selection and use through effective planning.

Shade Structures & Car Park Shades: Shades are made of unique, high density, durable polyethylene knitted fabric / high tensile fabric over galvanized tube frames which can be painted to your chosen color. Shades are ultimate combination of maximum sun protection, strength and durability to ensure maintenance free, long life performance. High Quality Architectural Shading Solutions. Shades can be customized to your specifications, mostly suitable for children. Technical Resources Workshop also provides Play Area & Swimming Pool Shades.

Car Park Shades can either be free standing cantilever type or can be connected to any existing structure at site. Car Parks are highly functional & are made of either HDPE or PVC Fabric. Wide variety of extensive shades is available to suit any environment. Car Park shades are the best alternative to block the sun's damaging UV ray's and are very attractive and affordable alternative to the conventional Garage.

Health & Safety Policy:

Elegance Steel Fabrication Workshop subscribes to un compromising commitment to personal and product safety for its employees, customers and clients.

The equipment and the material that we use in our manufacturing process and the end products that are produced will be continually evaluated for personal, environmental and workplace safety.
